Answer Part 1

Git Use with Engineering Workflow

Contract PR #19 preceded feature PRs #20-#26 into lab2-staging. Release PR #27 merged staging into main. Issues #11-#18 are Done in [Project #2](#).

Issue	Branch / PR	Outcome
#11	feature/11-lab2-contract / #19	Contract
#12	feature/12-requester-context / #20	Requester context
#13	feature/13-ticket-creation-api / #21	Create API
#14	feature/14-attachment-lifecycle-api / #22	Attachment API
#15	feature/15-create-ticket-ui / #23	Create UI
#16	feature/16-my-tickets / #24	My Tickets
#17	feature/17-ticket-detail-ui / #25	Detail UI
#18	feature/18-lab2-quality-evidence / #26	Quality
Release	lab2-staging / #27	Merged main
Required evidence		Working link
Review comments, replies, approvals		reviewer.md
Setup, tests, directory structure		README.md
Ignored secrets/dependencies		.gitignore

Commit graph proof

Feature merge commits 0a83616 through 3553a92 entered lab2-staging; release merge e962eb7 entered main.

Answer Part 2

Spec-Driven Development

Rendered source: [specification.md](#)

Section	Approved content
FR-01 to FR-17	Selection, create, ownership, list/query, detail, attachments, errors, accessibility and responsiveness.
BR-01 to BR-30	Backend values, validation, idempotency, ownership, pagination, attachment policy and safe errors.
AC-01 to AC-15	Testable Given/When/Then criteria.
Definition of Done	Traceable tests, docs, visual inspection, peer review, staging and main release.

Specification-before-implementation proof

Contract commit ccfe731 and PR #19 merged as 0a83616 before implementation PRs #20-#26.

Answer Part 3

Test-Driven Development and Traceability

Rendered source: [tests.md](#)

Layer	Actual evidence	Result
Unit/API	server/tests/lab-02	49/49 passed
UI	client/tests/lab-02	32/32 passed
E2E/RWD	e2e/lab-02/responsive-visual.spec.ts	6/6 passed
Build/schema	client/server build and Prisma validate	Passed/valid

Final output

Client 32/32, server 49/49, Playwright 6/6 at three viewports, both production builds passed, Prisma schema valid, and 39 screenshots refreshed. No required test is skipped or disabled.

AC range	Traceable tests
AC-01 - AC-03	Requester API, UI and E2E
AC-04 - AC-06	Ticket unit/API/UI/E2E
AC-07 - AC-09	Owned list/detail API/UI/E2E
AC-10 - AC-13	Attachment unit/API/UI/E2E
AC-14 - AC-15	Accessibility, responsive and screenshots

Answer Part 4

AI Use with Reflection

Rendered source: [ai-use.md](#)

LLM/agent: OpenAI Codex (GPT-5). AI assisted; human decisions and verification remained required.

#	Selected prompt	Verification
1	Summarize Lab 2 and steps.	Compared with labsheet.
2	Explain Issue acceptance criteria.	Inspected files and Issue.
3	Diagnose Docker/PostgreSQL.	Validated Prisma/migration/seed.
4	Explain GitHub workflow.	Checked branches/PRs/reviews.
5	Explain failed test and fix.	Reran focused/full tests.
6	Give unit/API/UI/E2E commands.	Ran final validation.
7	Help review partner PR.	Checked real diff/tests.
8	Audit Lab 2 documents.	Checked links and evidence.

My Reflection

Reflection

AI reduced guessing on requirements and technical problems. I decided whether suggestions fit the contract and verified results with the labsheet, source, tests, screenshots and GitHub.

[Check System](#)

Owned read-only Detail with active and removed Attachment states.

Required behavior	Evidence
Owned detail	Requester-scoped GET renders read-only values.
Add attachment	Permitted upload refreshes active count.
Download active	Safe filename, MIME and body returned.
Soft removal	Reason required; metadata retained.
Removed download	Safe 404; storage not read.
Unauthorized access	Cross-requester operations return 404.
Storage failure	Safe 500 without internals.

Automated proof

attachments.api.test.ts covers active/removed/cross-user download, cross-user list/remove, storage failure, upload policy, limit and compensation. TicketDetail.test.tsx covers invalid, failure, retry and unavailable states.
